Born 23.09.1996 · Driving licence B

// Profile

Mobile engineer who ships apps across fintech, maps and field operations with React Native, Flutter and TypeScript, and leads the team doing it. Since 2019: map-based field apps at Başarsoft, the calling experience of millions of users in Turkcell BiP's VoIP team, and today the digital wallet of licensed e-money institution Param, built from scratch.

Strongest where JavaScript meets the platform: native iOS/Android module bridges, NFC ID-chip reading, over-the-air updates. Comfortable on the backend (.NET Web API, Oracle PL/SQL, PostgreSQL). AI-assisted development is part of the daily workflow: agent-based tools such as Claude Code for fast prototyping and quicker test and refactor cycles, with generated code reviewed to the same standard as hand-written code.

// Experience

Param

Jun 2023 — Present

Senior Mobile Developer · Team Lead · Remote

The digital wallet of Param, one of Türkiye's largest payment and e-money companies.

- Built the Param digital wallet app from scratch with React Native; most active contributor to the codebase.
- Lead the mobile team: code quality, team coordination, and planning the development workflow in line with business goals.
- Brought an existing native iOS and Android identity verification (KYC) SDK to React Native: built a package that exposes the native SDK's document capture, NFC ID chip reading and video liveness to JavaScript through a native bridge. Published on npm and used by partner apps.
- Set up over-the-air updates, crash monitoring with Sentry, and session analytics with Smartlook.
- Brought AI-assisted development into the team's day-to-day: agent-based coding tools for prototyping, test generation and refactoring.

`React Native` `TypeScript` `Redux Toolkit` `Firebase` `Sentry` `CodePush` `Smartlook` `Swift / Kotlin bridge` `NFC`

Turkcell BiP

Jun 2022 — Jun 2023

Mobile Application Developer · Remote

The VoIP team of BiP, Turkcell's messaging and communication app with millions of users.

- Integrated and customised the Jitsi Meet library inside the React Native app for real-time voice and video calling features.

`React Native` `Redux` `Jitsi Meet` `WebRTC`

Başarsoft

Sep 2019 — Jun 2022

Mobile Developer · Ankara

Mobile and backend development at Başarsoft, a maps and geographic information systems company.

- Built mobile apps with React Native, native Android and iOS; contributed to Flutter projects. Fleet booking, water-delivery and distribution apps, and a survey app used in 10 countries.
- On the backend, wrote .NET Web API services and managed Oracle PL/SQL and PostgreSQL databases.

`React Native` `Android` `iOS` `Flutter` `.NET Web API` `Oracle PL/SQL` `PostgreSQL` `GIS`

Başarsoft

Jun 2019 — Sep 2019

Intern · Ankara

Mobile development internship with React Native.

Sentos

Feb 2019 — Jun 2019

Intern · Konya

Assisted in web development and marketplace integration projects.

// Projects

Param Wallet

Live

The digital wallet of licensed e-money institution Param: cards, transfers, bill payments, campaigns. Started from scratch with React Native in 2023; primary contributor since.

`React Native` `TypeScript` `Redux Toolkit` `Firebase`

Param KYC Bridge

Live

React Native package wrapping an existing native iOS and Android identity verification SDK: the native SDK's document capture, NFC ID-chip reading and video liveness exposed to JavaScript through a native bridge. Published on npm and integrated into partner apps.

`Native bridge` `NFC` `Swift / Kotlin`

Turkcell BiP

Live

Turkcell's messaging and calling app with millions of users. In the VoIP team I integrated and customised Jitsi Meet based real-time calling features.

`React Native` `Jitsi Meet` `WebRTC`

Vouch

Beta

Side project. Offline-first cleaning-turnover app for short-term-rental hosts: before/after photos per checklist item, low-supply flags, damage reports, shareable PDF. Built largely with AI-assisted workflows.

`Expo` `Supabase` `MMKV` `RevenueCat`

StreetShelf

Beta

Side project. Hyper-local network to gift, lend or rent things to neighbours or post what you need; listings by distance or invite-only groups, in-listing chat with transaction cards. streetshelf.app

`Expo SDK 57` `Expo Router` `Supabase` `pgTAP`

Agent Office

Open source

Electron app that runs a team of Claude Code agents from a pixel-art office: the lead splits a goal into tasks, and every task closes only with evidence (typecheck, build, tests). github.com/melihdikmen/agent-office

`Electron` `TypeScript` `Claude Code` `MCP`

2026	**Bardak Bardak** Flutter · in progress	Tea-sorting puzzle game built with Flutter and the Flame engine, with AdMob, being prepared for the App Store and Google Play.
2026	**AcenteDefteri** React · in progress	Policy renewal tracking for small insurance agencies; AI parses policy PDFs into customers and renewal dates via Supabase Edge Functions.

2025	**RestoSync** Next.js · in progress	Restaurant POS and kitchen display merging dine-in, pickup, courier and delivery-platform orders in one flow.
2021	**Forest Fire Decision Support** React Native · GIS	Active and extinguished fires on the map, spread estimation from parameters, unit positions with area and distance measurement.
2021	**Saka Su Courier** Flutter	Order distribution for dealers: orders mapped by time, background refresh, push for new/changed/cancelled orders, route drawing.
2020	**Saka Su & Erikli Distribution** Android	Native Android distribution apps: order list and map, notifications, delivery route, order updates and cancellation.
2020	**GFK Survey** Android	Development and bug fixing on a survey app actively used in 10 countries.
2019	**Başar Fleet** React Native	Fleet management: users book company cars, managers approve via notification, confirmations return to the user.
2018	**Splitpay** React Native	First React Native app: splits group expenses equally or by coefficient, with instant group chat.

// Skills

Mobile	**React Native**, **TypeScript**, Flutter, Android (Java / Kotlin), iOS (Swift), Expo, Redux Toolkit, Zustand, React Navigation, Reanimated, Jitsi Meet / WebRTC
AI-assisted dev	**AI-assisted development**, Claude Code, agentic coding workflows, prompt engineering, Claude API
Backend	.NET Web API, C#, Node.js, REST, Firebase, Supabase
Database	Oracle PL/SQL, PostgreSQL, SQL, MMKV, SQLite
Tools	Git, GitHub Actions, Jenkins, EAS, CodePush, Sentry, Smartlook, Jest, Testing Library, Figma
